

**About the products:**

- The latest production technology
- Excellent quality of raw materials
- Permanent quality control

**About the producer:**

- Extensive experience in the production of diamond tools
- Ongoing development of production processes and diamond tools
- Member of the German Abrasives Association (VDS), the largest national association of the European abrasives industry
- ISO 9001 certification and compliance with European Standard EN13236 for diamond tools

**Technical specification:****Applications:** Wet cutting**Concrete + Reinforced concrete + Concrete with a wide range of additives**

Characteristics:

- Machine rating kW:

Up to 7,5 kW**7,5 kW to 22 kW****Over 22 kW**

- Double-sided laser weld:

prevents segment rupture even in extreme applications

- Fast cutting even in very thick reinforcement steel

- Long service life

- Available dimensions of borehole:

Ø25,4/ 60,00 mm

- Disk thickness: **3,2/ 3,5 mm**

- Segment thicknesses: **4,0 mm to 5,0 mm**

* Various other product specifications as disk thickness; segment thickness; disk diameter and etc. are available on request
